

The Emirates Air Line

Client:	The Emirates Air Line
Location:	London, UK
Products Used:	Complete Briton ironmongery package

The Emirates Air Line is the UK's first and only cable car network. It sits 90 metres above the River Thames in the heart of London. The £44 million project was completed in time for the 2012 London Olympic Games and is operated by Transport for London.

The terminal buildings are an important element of the day-to-day operations of the network – Allegion was awarded the contract to provide a door solution to keep the terminals secure.

Products were selected to ensure the highest levels of safety and flexibility in a challenging environment using a complete ironmongery package from the Briton range.
