

New Doha International Airport

Client:	Overseas Bechtel Incorporated & HOK Architects
Location:	Doha, Qatar
Products Used:	LCN 4000 Series cast iron door closers Von Duprin's Chexit Device

At a cost of \$5.5Bn, the airport was originally designed to handle an annual capacity of 12m passengers, but needed to be expanded to handle the movement of more than 24m passengers a year.

Allegion was selected as the security and life safety provider based on over 60 years of proven solutions worldwide.

From the architectural design of the terminals, to the escape routes, to the passenger flow from curb to gate, Allegion provides not only a security environment but a safe environment for passengers and airline workers alike.
