

4700 Series

Automatic flush bolt

A flush bolt for use on equal or unequal pairs of doors to keep the inactive leaf locked. The bolt is thrown and released by the active leaf as it closes or opens.

Ref:	Description
FB41P	Automatic flush bolt - Bolt is actuated by the closing action of the door. Meets ANSI A156.3 Type 25. Supplied as a pair. Fully automatic - inactive door is latched, bolts are extended when active door closes. Bolts retract when active door is opened. Low activation forces - top bolt has no spring tension.

Certification

- ANSI A156.3 Type 25
