

## 581 Series

### Emergency exit hardware

The Briton 581 Series is a modular system of push pad emergency exit hardware suitable for timber or metal doors.

The 581 push pad unit can be used on its own as a single point rim latch device or with the addition of vertical bolts can provide multi-point latching for single or double door combinations.

Top Pullman

Upper Side Pullman

Bottom Pullman

Lower Side Pullman

#### Certification

- CE Marked to EN 179
- Fire tested to EN 1634 for use on fire doors up to 2hr timber / 2hr steel
- DoP available at [www.britoninspec.co.uk](http://www.britoninspec.co.uk)

#### Features & Functions

- Robust construction with improved durability suitable for all heavy traffic applications.
- Technologically advanced design with proven performance and reliability.
- Unique assembly reduces installation time by as much as 50%.
- Vertical shoots can be cut on-site.
- Easy-to-use Accufit templates and back-plates for the individual devices and the pullman latches
- Patented Fast-Fix cable system replaces the conventional vertical rods to connect the operating unit and the pullman latches
- Fine adjustments of the cable system are possible in-situ for maximum accuracy during installation
