

## 98 & 99 Series Von Duprin Heavy duty panic exit hardware

A comprehensive range of solutions which can be applied to any single or double door requiring immediate escape. The robust construction not only satisfies the requirements of EN 1125 for CE marking but has passed the stringent testing necessary for approval to ANSI A156.3 and UL listing.

The solutions available range from purely mechanical touch bar exit devices to electronic latch retraction for more sophisticated control applications. At the heart of each solution is a touch bar actuating device which is offered as either a rim latch device, with surface mounted vertical bolts or with 3 point locking using pulman latches.

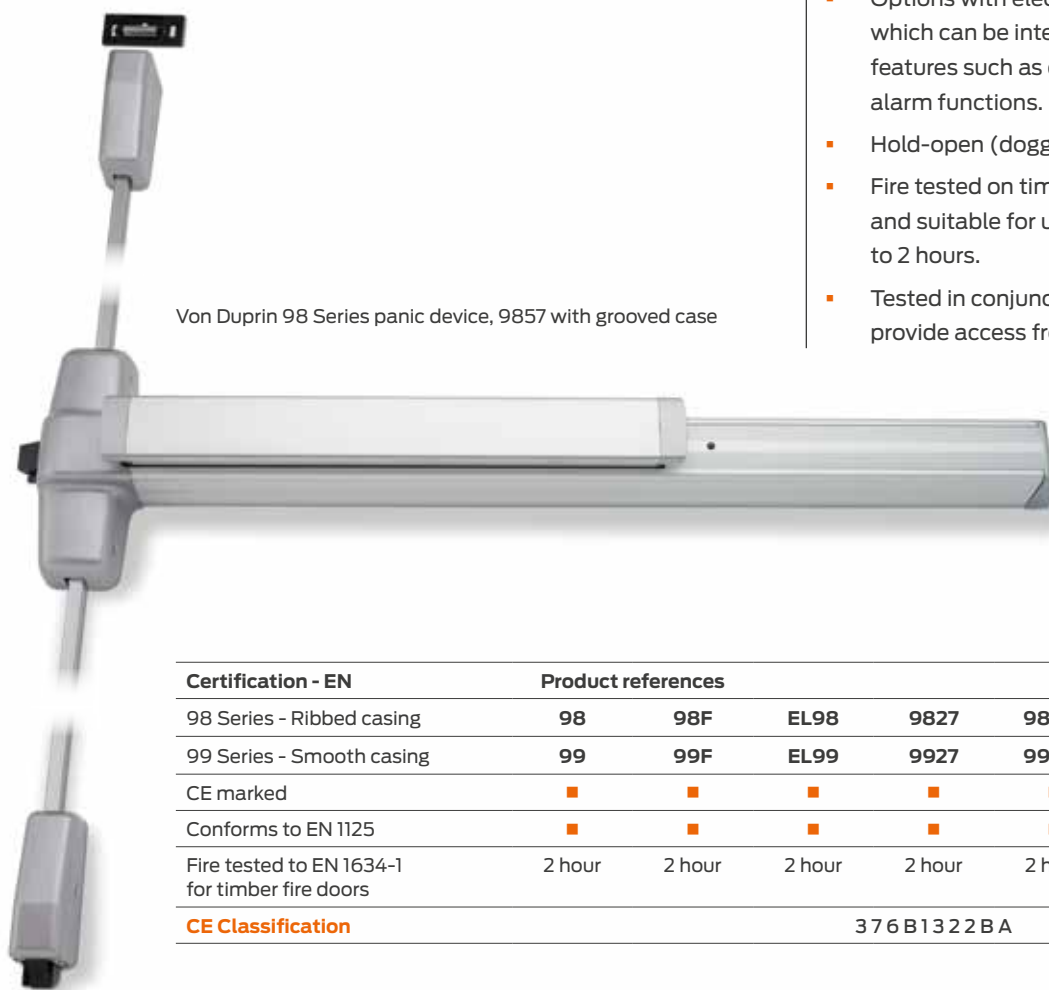

#### Certification

- CE Marked to EN 1125
- ANSI A156.3 Grade 1
- Fire tested to EN 1634 for use on fire doors up to 2hr timber
- DoP available at [www.britoninspec.co.uk](http://www.britoninspec.co.uk)

#### Features & Functions

- Single, double or three point latching.
- Single point rim latching or with vertical bolts and pullman latches.
- Shoots and touch bar can be cut on-site to suit door widths/heights.
- Suitable for door leaves 610mm to 1200mm wide
- Adjustable shoots.
- Slimline extruded aluminium vertical rods
- Self handed.
- Options with electric latch retraction which can be interfaced with additional features such as delayed egress and alarm functions.
- Hold-open (dogged) options available.
- Fire tested on timber doors to EN 1634 and suitable for use on fire doors up to 2 hours.
- Tested in conjunction with external trim to provide access from outside.
