Introduction letter by our CEO

Allegion is building a great story of success for our customers, employees and shareholders. As we enter our third year as an independent company, the early chapters of the Allegion story continue to be written, revealing early success and a bright future.

When we became an independent company in 2013, Allegion created a strong strategic vision, purpose and set of values to drive our Five Growth Pillars.

Our pillars help guide Allegion's path for the future. The initial chapters of the Allegion story show how focus, discipline and execution were leveraged to outperform the market, move opportunistically and shape our future.

We've invested in our people, product portfolio, channels, systems and infrastructure to strengthen Allegion's position as a global safety and security leader. At the same time, we're refining our strategy to position our business for long-term growth, making the tough capital deployment decisions to position us for the future, while maintaining our industry-leading returns.

Innovation is thriving with new products, business models and acquisitions. New people have been added to the Allegion family through acquisitions, giving us new perspectives, capabilities and customers. We are building a winning culture through employee engagement that is driving transformation, accelerated growth and profitability in all regions of the world.

Our vision, purpose, values and growth pillars

Allegion's board of directors, in partnership with management, sets our strategic direction. From the beginning, Allegion's vision, purpose and values, supported by our Five Growth Pillars, have been our compass. Whether through the launch of connected home solutions, the acquisitions of AXA, Brio, Milre, SimonsVoss and Zero, or the launch of our channel-led business in the Americas, everything we do reinforces our vision and values. We are guided by these Five Growth Pillars:

- Opportunistic acquisitions
- Expansion in core markets
- Enterprise excellence
- Growth in emerging markets
- Innovation in existing and new product categories

Additionally, our balanced capital allocation strategy continues to give us flexibility to support value-creating investments that grow our business. As we continue to write our story, we believe this approach will continue to enable our business success, as we continuously measure our progress based on our strategy, the Five Growth Pillars and the external environment.

Our people

The thousands of Allegion team members around the globe remain our most valuable resource. Their commitment to our business is reflected in our customer satisfaction, employee engagement, and industry-leading results. Allegion has the best team in the industry! The board of directors and leadership team are committed to increased employee engagement and remaining one of the safest and healthiest work forces in the world. We believe a highly engaged team contributes to a great business and provides long term value.

CEO: Dave Petratis

The future

Allegion is aware of the complex security issues facing today's world. With more than seven billion people on the planet, safety and security have never been more critical – or more desired. The convergence of mechanical and electronic security solutions will continue to increase as the world becomes more reliant on connected devices and embedded intelligence. Allegion's leadership in mechanical products positions the company well for the intelligent convergence in the connected world. Product vitality and growth in electronics is increasing rapidly today and reflects a great opportunity for future growth. By continuing to make smart investments in our business, investing in our team of experts and addressing the security challenges of tomorrow, we believe the next chapters of the Allegion story will deliver profitable growth, value to shareholders and customers, and to the Allegion team.

My very best,

A handwritten signature in black ink, appearing to be 'D. Petratis', written over a horizontal line.

Dave Petratis, Chairman, President and Chief Executive Officer
Allegion plc

Corporate Introduction

History

While Allegion is a new name in the security industry, we are not new. For over a century, we have kept people safe and secure with category leading products. From inventing the “panic release bar” exit device in 1908 to pioneering the first-ever electric-controlled lock, our brands have been innovators for almost as long as people have locked doors. Their entrepreneurial spirit is at the core of who we are.

As an independent Allegion, we are able to unlock our company’s true potential. By tapping into that entrepreneurial spirit that has made us the leader in mechanical security, we will continue to drive forward and integrate tomorrow’s electronic solutions into everything we do. Our long history of expertise in the commercial industry enables us to have better quality, stronger, and safer products for our residential customers. Together, with the power and passion of our global employees, we will realize Allegion’s full potential as we continue to be a leader in the global safety and security industry.

Allegion Legacy Timeline

Von Duprin®

Invented the exit device, and received the 1st patent of that type in 1909.

Ranks No. 1 in its category in N. America

1908

1920

Schlage®

Awarded the 1st patents for cylindrical and push-button locks.

Ranks No. 1 in its category in N. America

CISA®

Patented the first electrically controlled lock.

Ranks No. 1 in its category in Italy

1926

1926

LCN®

Created the door closer in response to a request by Boston’s Trinity Church.

Ranks No. 1 in its category in N. America

Interflex®

Created to supply a complete solution for productivity, security and workforce management.

A European market leader

1976

1995

SimonsVoss®

Took security to a new level with the keyless digital transponder.

Among the Top 3 in its category in Europe

Schlage Lock de Colombia

Acquired the 2nd largest mechanical lock manufacturer in Colombia

2014

2013

Allegion™

Created as a spin-off from Ingersoll Rand Security Technologies to bring greater focus on safety & security.

Became a constituent of the S&P 500® on Dec. 2, 2013

Corporate Introduction

Schlage Lock de Colombia

Acquired the 2nd largest mechanical lock manufacturer in Colombia

2014

2014

Eco Schulte

Obtained a minority stake in exchange for the Randi brand. 3rd generation German manufacturer

iDevices®

Made an equity investment and strategic alliance with a leading U.S.-based provider in the Internet of Things

2015

Corporate Introduction

Expertise

At Allegion, we help keep people safe and secure where they live, work and visit. With more than 25 brands sold in over 130 countries across the globe, we specialize in security around the doorway and beyond: everything from residential and commercial locks, door closer and exit devices, steel doors and frames to access control and workforce productivity systems.

At the core of our \$2 billion business is the knowledge and experience of the 9,000+ dedicated employees behind our brands. We help our customers navigate their toughest security challenges, and we help builders and property owners differentiate themselves by providing innovative and secure solutions. Operational excellence is a key part of what we do for our customers, and is a focus for our employees. Our trained specification writers and experts not only help our customers adhere to codes and standards – we help advocate for and raise those security standards in the first place, in markets around the world.

While mechanical hardware is the foundation of our business and will always be at the core of what we do, we recognize that the future of the security industry lies in addressing the needs of an increasingly connected world. Electronic solutions don't replace our mechanical products – they make them more powerful. That's why our core strength in mechanical security, when combined with digital, mobile and interconnected electronic solutions – and our expertise in style and design – makes us a leader in our market.

Areas of Expertise

CONSULTATION SERVICE

Because we believe in the quality and craftsmanship of our products, we want to ensure that they meet their full potential. All of our hardware consultants provide you with unmatched service and expertise in the hardware purchasing process. From determining the unique needs of your building to being well-versed in various building codes including local and national building regulations. Meeting with an Allegion consultant will leave your architectural vision intact and secure. Our Allegion hardware consultants are regionally located to provide you with a team of dedicated resources who will understand the needs of your firm and clients. During our assessment of your needs, we'll communicate any areas of concern to you so that we can identify aesthetically and functionally appropriate customizable solutions. . What's more, we offer products that exceed the highest security standards and can communicate seamlessly with other systems and features within a building for the ultimate in safety and security.

One size does not fit all. At Allegion, we understand that not all security systems work for all situations. Our brands can tailor their components around your needs—giving you specialized security that comes with the same peace of mind you get with all of Allegion's products.

CUSTOM SOLUTIONS

1. Quiet solutions

Perfect for hospitals, concert halls, libraries and more, find security components that are whisper-quiet, including quiet push pads and latches.

2. Custom decor solutions

Enhance your building's personality with customizable security solutions—to provide an atmosphere that is inspiring without sacrificing safety.

Corporate Introduction

Areas of Expertise

3. High security solutions

When certain areas of your business need more security than others, count on Allegion's high-security solutions to keep out unwanted visitors and monitor your most trusted spaces.

4. Environmental solutions

Sometimes Mother Nature, water, salt and other chemicals can wreak havoc on your security systems. Keep up the performance of your security products with durable, long-lasting opening units—in any geographic location.

5. Flexible solutions

Doorways come in all shapes and sizes. Find security products that meet a variety of requirements with our flexible security solutions.

for excellence

Our Brands & Products

European Hardware

AXA

Specialists in home and bike security offering high quality door and window fittings, access management systems, bicycle locks, chain guards and accessories.

BRICARD

Bricard Art is a luxury line of Bricard, a unique range of hand-crafted door hardware in historical designs and luxury finishes.

Brio

Wide range of innovative sliding and folding door architectural hardware from cutting edge screen solutions, to tracks and specialist hardware kits.

Briton

Global brand of high quality, highly engineered architectural hardware products including door controls, exit hardware, locks, cylinders and door furniture.

Our Brands & Products

European Hardware

Well known international brand of highly secure access management systems, offering protection against the most sophisticated methods of intrusion. Including cylinders, mechanical and electronic locks, panic bars, door closers, safes and padlocks.

Industry-leading electromechanical security devices, securing facilities across the globe. The environmentally friendly FSH EcoLine of energy saving electromechanical locking devices assist in reducing the carbon footprint, setting the trend in the security industry today.

International brand offering complete solutions for workforce management with time management and personnel scheduling, as well as innovative security systems containing access control, video surveillance, visitor management and biometrics.

A comprehensive range of leading security and safety products including mechanical locks, cylinders, masterkey systems, door closers and panic exit devices for the Turkish market.

Our Brands & Products

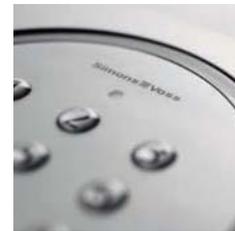

European Hardware

A range of residential and commercial lockcases, lever handles, locks and latches including design suited for use with sprung lever furniture.

Premium brand that has revolutionized conventional mechanical locking systems using digital technology and integrated access control functions, including a digital transponder instead of a key.

NORMBAU

European architectural hardware, designed with function, environment and accessibility in mind. Specialised range of hardware, design solutions, partitioning systems, handrails, balustrades and bathroom fittings for healthcare.

Premium range of European bicycle locks, lights, wearable technology and electronic control units.

Our Brands & Products

European Hardware

KRYPTONITE®

Premium portable and action sports security products including high quality cables, chains, U-locks and flexible security systems for the bicycle, powersport and hardware markets.

Ailie

Leading residential security solutions brand in South Korea, with a focus on high-quality and innovative digital door locks.

PegaSys

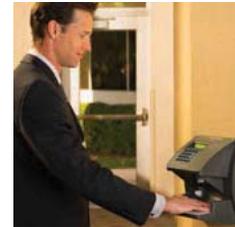

An intelligent and flexible access control system, particularly for institutions of education, industrial and government buildings.

Our Brands & Products

American Hardware

Commercial and residential leader in locks and readers. From durable mechanical locks to comprehensive access control solutions and biometrics, Schlage is known for its quality and flexibility to provide a scalable solution.

GLYNN-JOHNSON

Known throughout the industry as the "overhead door holder specialist", Glynn-Johnson door holders and latches are manufactured with state-of-the technology, delivering superior quality and exceptional performance.

LCN

Door closers and hardware trusted to work seamlessly during critical moments. With high standards of performance, LCN products are ideal for high-traffic environments such as schools, hospitals and government buildings.

VON DUPRIN

High performance exit devices, access control solutions and accessories, known for their unparalleled quality and performance, providing peace of mind in critical moments.

Our Brands & Products

American Hardware

FALCON®

A simple range of cost-effective exit devices, locks and door controls that meet or exceed life safety and building requirements.

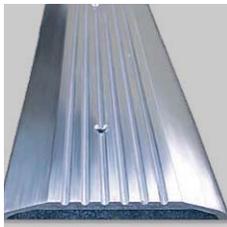

IVES®

Premium quality door hardware and accessories; hinges, pivots, flush bolts, strikes and protection plates that deliver application flexibility and superior value.

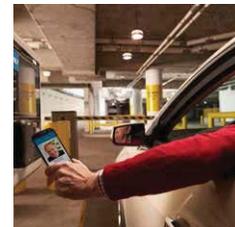

Category leader in premium sealing systems; sound control, fire and smoke protection and threshold applications, supporting heating and cooling efficiency in green buildings.

aptiQ®

Smart credentials, readers, and mobile app technology to enable secure and efficient access in multi-family and commercial environments.

Our Brands & Products

American Hardware

Extensive collection of custom designed and made-to-order door hardware that perfectly reflects each unique space.

Competitive proximity card technology for access control.

Specification & Demand Creation

Value Proposition

Allegion is committed to providing a total product and specification solution which can save you valuable time by offering the following services:

- Preparation of door hardware specifications, hardware schedules and numerical door indexes compliant with ANSI & European Standards.
- Individual product data sheets, catalogue cuts, certification and Declaration of performance.
- Consulting on necessary building regulations to ensure fire, life-safety and accessibility requirements are met.
- Review and comment on hardware submittals.
- Offer branded specification to allow easy comparison of supplier quotes.
- Conduct pre-installation meetings and post installation detailed master key schedules and
- Advice on access control upon request.
- Offer specialist advice and training on building regulations, vertical market solutions, mechanical and electronic hardware.
- Provide detailed masterkey schedules and advice on access control systems.

As a manufacturer of architectural hardware products, our specification team are in a unique position to provide.

Our qualified specification writers and trained technical experts not only help our customers adhere to codes and standards, we help advocate and raise security standards in markets around the world.

Because we believe in the quality and craftsmanship of our products, we want to ensure that they meet their full potential. All of our specification consultants provide you with unmatched service and expertise in the hardware purchasing process. From determining the unique needs of your building to being well-versed in various building codes—including local and international building regulations—meeting with an Allegion consultant will leave your architectural vision intact and secure.

During our assessment of your needs, we'll advise on any areas of concern to you so that we can identify aesthetically and functionally appropriate customizable solutions. What's more, we offer products that exceed the highest security standards and can communicate seamlessly with other systems and features within a building for the ultimate in safety and security.

We are both a RIBA & AIA network member and accredited RIBA & AIA core curriculum provider. We frequently conducting AIA CPD, Lunch & Learn Programs.

Specification & Demand Creation

Meet Our Specification Team

Mohamed Salim Ishaq, AHC, FDAI
Specification Team Leader

Salim is a certified Architectural Hardware Consultant (AHC) & Fire Door Assembly Inspector (FDAI), under the license from the Door & Hardware Institute in Virginia, USA, and Specification Leader for Allegion in Dubai. He has over 18 years experience in the hardware industry working on healthcare, transportation, hospitality, commercial and residential building projects in the Middle East.

In his role as Specification Team Leader for the MEA region, Salim is responsible for leading the team, and supporting a comprehensive program of demand creation activities, offering specification writing services to architects, consultants, designers and building owners. He is also responsible for product training and providing consultancy services to architects involved in projects across the region.

Hamza Ali
Sr. Specification Writer

Hamza Ali is a qualified mechanical engineer, and Specification Writer for Allegion MEA, based in Dubai. He completed his studies at Bangalore University, India, and has 23 years experience in the door and hardware industry. During this period, Hamza has completed specifications, including the supply and install of hollow metal doors and hardware, for a variety of projects such as hotels, power stations, residential towers, offices, hospitals and schools.

Hamza joined Allegion, Dubai in 2015 and has held his position as one of the senior specification writers experienced in both ANSI and EN standards of hardware.

Farana Baig, DipGAI, MInstAI, RegAI
Specification Writer

Farana Baig is a gold medalist and a pinnacle award winner in European hardware from the 'Guild of Architectural Ironmongery' GAI, UK, which is the most recognized qualification in the ironmongery industry. Farana graduated in Civil Engineering from Osmania University, Hyderabad and she is a Hardware Specialist in BSEN & ANSI Standards.

Farana joined Allegion in 2015 as a Specification Writer, She has over 8 years of experience in specifying door hardware & access control products for various projects in different vertical markets such as Residential, Commercial, Hospitality, Healthcare and Educational projects.

Alongside Specification, Farana also delivers RIBA approved CPD's to the architectural community. She is on the Continuing Professional Development program with GAI and attends GAI meetings in the region.

Specification & Demand Creation

Meet Our Specification Team

Marlon Calong
Sr. Technical and Training Specialist

Marlon Calong is a civil engineer and employed as a Sr. Technical and Training Specialist with Allegion in Dubai, UAE. He completed his studies from Mapua Institute of Technology in Manila, Philippines, and has over 25 years experience in the industry with door manufacturers, distributors and hardware suppliers.

Marlon joined the organization in 2006 and has been involved in the specification, coordination and supply of hardware for various projects such as airports, hospitals, hotels and government buildings among others.

Marlon started his career as an office engineer in Saudi Arabia for a door manufacturing company and over the years progressed through increasingly senior roles up to his current position.

Silcy Simon
Specification Writer

Silcy Simon is an electronics and communication engineer, and is working as a Specification Writer for door hardware at Allegion in Dubai, UAE. Silcy has 3 years experience working on residential, commercial and retail buildings and structures. During this time she has worked on a variety of project scales, from individual buildings to large-scale mixed-use developments.

Silcy joined Allegion in 2010 as Customer Coordinator, building her expertise on our product and service offering, and then progressed to her current role of specification writer.

Aside from providing technical specifications to the architectural community, Silcy is studying to become a certified architectural hardware consultant.

Hilmy Kariapper
Specification Writer

Hilmy is a qualified quantity surveyor and Specification Writer with Allegion, Dubai, UAE. Hilmy completed his studies from City & Guilds, Institute of London, England (Sri Lanka Chapter). He has over 16 years experience in the door and hardware industry, having worked in quantity surveying, estimating, project management, door & hardware scheduling & specification writing for government, healthcare, hospitality, commercial and education projects.

Hilmy started his Career as a quantity surveyor in Dubai working for a Hollow Metal Door manufacturing company and supplier of hardware, executing various types of projects, later promoted to senior quantity surveyor and into his current role of specifications writer.

Specification & Demand Creation

Meet Our Specification Team

Arun Prabhu
Architectural & End User Consultant

Arun has 13 years experience in architectural hardware. He worked for 8 years as a project manager in the door, hardware and frame industry in New York City, gaining experience of American hardware and codes. He then progressed to a specification managerial role in India.

Arun has been with Allegion for the last 3 years and is responsible for developing and maintaining relationships with key architects who work in the transportation, healthcare and hospitality industry.

A member of the Door Hardware Institute (DHI), Arun has a great understanding of the building process, building design and technical details, which makes him a valuable asset to any project.
