Fit Briton & Stay Safe

Are your fire doors legal? These simple checks could save lives.

1. Door Furniture

- Does the handle operate smoothly and freely return to a horizontal position?
- Are all the screws tight?
- If on an escape route, can the door be opened without a key?
- ר י

2. Hinges

- Are there a minimum of 3 hinges with all the screws fitted securely?
- Are the hinges free of metal fragments and oil leakage which could be signs of wear?
- Are the hinges marked with a CE stamp or BS EN 1935 grade 13?

3. Locks and Latches

- Does the latch hold the door firmly in place without rattling?
- Does the latch/deadbolt engage fully into the strike plate?

4. Door Closers

- Open the door to 5° or 75mm. Does it close and engage the latch?
- Is the closer correctly fitted to the door and frame?
- Is the closer free from damage and not leaking oil?
- If unlatched, does the closer hold the door in line with the frame and intumescent seal?

5. Hold Open Devices

 When required, does the door release immediately and close fully into the frame?

6. Signage

- Does the door display the correct signage? All fire doors MUST be signed.

7. Exit Devices

- Is the panic or emergency exit device functioning correctly?
- Are the fixings of the operating device, bolts and strikes tight?

8. Door Seals

- Are the intumescent and/or smoke seals in good condition, not missing or damaged?
- Are the door seals to the correctly specified fire rating and function?
- Are the seals well attached inside the groove in the frame or door leaf?
