

# FBLS

## Fire Block Louvre System

### Fire-Stopping Ventilation for Steel Fire Doors

#### Why choose the Fire Block Louvre System?

The Fire Block Louvre System delivers ventilation without turning that opening into a route for smoke or fire. When you need airflow and fire protection in the same aperture, the FBLS is the sensible, compliant option for your steel fire doors.

#### Key benefits

- Tested to BS EN 1634 1:2014, providing up to four hours of fire integrity
- 40% free area for effective airflow
- Ideal for offices, classrooms, plant rooms, stores and other spaces that need both ventilation and fire protection
- Perfect for new builds or retrofits
- Suitable for door thicknesses from 44 millimetres upwards
- Available in a range of stock sizes, with bespoke sizes made to order
