Door furniture &  
accessories

Product overview

## Briton door furniture & accessories

The first point of contact for anyone entering and moving around a building is the door hardware, whether that is a pull handle or a lever handle. In addition to having the right look, the hardware you select must have the right feel and finish and be backed up by a level of performance which will ensure the hardware is suited to the application and the amount of use or abuse it will have to endure.

The latest Briton door furniture and accessories are a high performance range of designs suitable for any application, including the full hardware requirement of the majority of doorsets.

Fully compatible with all Briton cylinder lockcases and overhead door controls to provide a fully integrated hardware solution.

See pages 4 to 14

The Normbau branded range of hardware in steel cored or solid nylon offers a coloured alternative to stainless steel. The comprehensive range of fittings encompasses all the components required for a fully integrated doorset in a range of 10 colours.

Compatible with Briton door controls which are available in matching powder coated finishes.

See pages 15 to 27

# Quality starts with performance and durability

The first point of contact for anyone entering and moving around a building is the door hardware, whether that is a pull handle or a lever handle. In addition to having the right look, the hardware you select must have the right feel and finish and be backed up by a level of performance which will ensure the hardware is suited to the application and the amount of use it will have to endure.

The Briton Specification Series of door hardware is a high quality, high specification range of lever and pull handle door furniture in satin stainless steel. The range encompasses the complete hardware requirement of the large majority of doorsets.

Lever furniture features a unique fixing method which provides a firm, positive and highly durable installation. When combined with designs which meet the requirements of BS 8300, successful fire testing to 90 minutes on timber doors and 4 hours on steel doors and our 10 year warranty, Briton Specification Series hardware is ideally suited to new build or refurb installations which require a classical contemporary appeal.

To support the performance characteristics, Briton Specification hardware has the following features:

- Back to back fixing bolts and threaded bushes on lever furniture provide a strong through fixing.
- Spindle is fixed to the inside and the outside lever handle by "break thru" grub screws providing greater security and durability.
- All lever handles achieve EN 1906 Grade 4, the highest grade of use within the standard\*.
- Grub screw fixings on levers concealed from view on the underside.
- Slimline roses only 4mm thick.
- Precision engineered levers are prefixed to the rose or plate inner by hi-tensile circlip.
- Unique 'ClickFit' system provides a positive snap fit for pressed rose and escutcheon covers.
- Torx head fixings supplied with all leversets and plate mounted levers provide a high quality look and minimise tampering.
- Comprehensively tested to EN 1634 for use in timber fire doors up to 90 minutes and steel doors up to 4 hours (see fire test certificate for further details).
- All stainless steel construction Grade 304 with Grade 3 corrosion resistance to EN 1670.

\* Grade 4 category of use is defined as suitable for high frequency use on doors which are subject to frequent violent use, e.g football stadiums, oil rigs, barracks, public toilets.

Briton 4700 Series door furniture - Pull handle fixings

Pull handle fixings

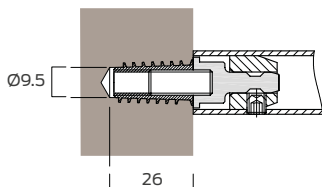

All Briton 4700 Series pull handles can be ordered individually and must be ordered together with a standard fixing pack which contains all the components required to mount the pull handle in any of the 4 applications shown below.

For back to back assembly simply order 2 individual pull handles plus the standard fixing pack.

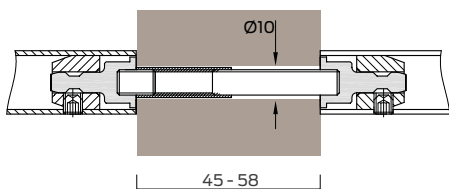

Bolt through - single pull handle

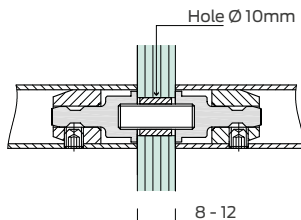

Secret fix - single pull handle

Back to back pair on timber door

Back to back pair on glass door

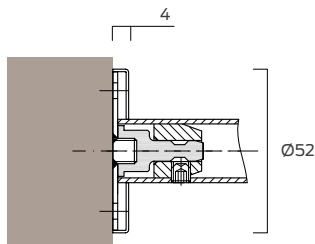

Ref:	Description
4726	Standard fixing pack for timber, metal or glass doors

Rose mount fixings

Briton 4721 and 4722 pull handles can be ordered with an optional face fixed rose. One fixing pack is required for each pull handle and they must be ordered according to the pull handle diameter (20 or 22mm).

Roses are supplied with stainless steel face fixing screws. Snap fit push on covers conceal all fixings.

Ref:	Description
4725.20	Face fixed rose mounting kit for 20mm diameter pull handles.
4725.22	Face fixed rose mounting kit for 22mm diameter pull handles.

**For optimum performance**

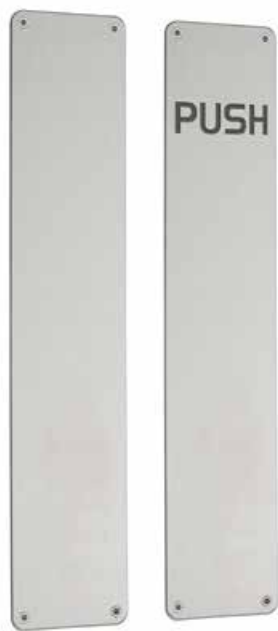

The 4700 Series furniture range offers specifiers a wide choice of styles for the primary operating hardware - lever handles and pull handles - which are ideally matched with the Briton ranges of high performance lockcases, Briton and CISA Euro profile cylinders for optimum performance.

# A range of accessories completes the integrated door hardware package

## Accessories

The Briton door furniture range includes a selection of additional components required to complete a doorset specification. All accessory components are manufactured in satin stainless steel to match the principal items.

**Kick plates**

Kick plates are available in Grade 304 stainless steel in heights and widths to order. Plates have square corners as standard but are also available with radiused corners (5mmR or 10mmR).

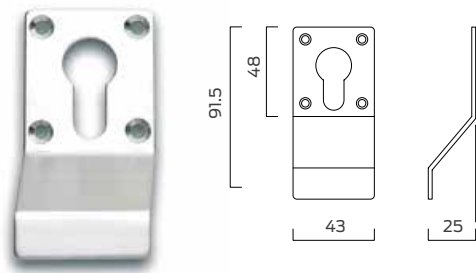

Supplied with face fixings as standard (self adhesive option also available).

Other options and materials are available - please ask for details.

Plates are priced per square metre.

Description:	Push and Pull plates for use with bolt through pull handles	
Options:	Plain or engraved. Radiused corners with face fixing screws. Supplied singly.

## Normbau nylon hardware

Normbau 0440 steel cored pull handles in black with 0471 44 back to back fixing for glass doors.

# Colour co-ordinated hardware in solid nylon

Normbau solid nylon hardware is in constant use in public and commercial buildings throughout the world and has a proven track record of durability and performance. Normbau nylon is coloured throughout and will not fade or chip making it an ideal choice for areas of heavy usage such as schools, hospitals and leisure centres.

# Tough, hygienic and warm to the touch

## Standards and performance

Normbau nylon lever and pull handles are inherently warm to the touch which makes the Normbau range an ideal solution for applications which must satisfy the requirements of BS 8300 for disabled access. The choice of colour can be done for aesthetic or practical reasons in order to maximise colour contrast with the door face to assist users with impaired vision.

Normbau products have been approved by PSA to MOB H3PS high duty performance standards and lever sets conform to EN 1906:1999

Critical products in the Normbau range have either been included in fire tests or have been assessed to BS 476 Part 22:1987. For further information on fire certification please contact the Allegion Customer Care Team.

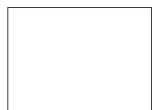

Normbau nylon products are precision manufactured from high strength polyamide nylon that is:

- Scratch resistant
- Hygienic
- Cadmium free
- Anti-static
- Highly resistant to weather, fading and ageing

All products are available as standard in 10 distinctive colours. Other colours to match corporate environments can be achieved at additional cost.

For the purpose of colour co-ordination with other building elements we have provided the nearest RAL-DS colour reference.

They are also resistant to conventional domestic cleaners, disinfectants, dilute acids and alkalis.

Normbau levers are available in solid nylon or with a steel core for additional strength.

They are available in a variety of rose or plate mounted options. All variants feature:

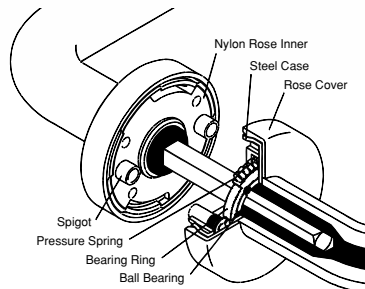

- Bolt through fixings at lever and escutcheon positions to suit Briton mortice lock cases.
- Concealed fixings with snap on rose/plate covers.
- Supplied complete with all fixings and appropriate spindles for specified door thickness.

Normbau leversets are available in three mounting and construction options. The fittings are not interchangeable and must be ordered as complete assemblies.

### Ball bearing mounting

Levers are supplied with backplates or roses which incorporate a ball bearing race which retains the lever for a quick and maintenance free assembly.

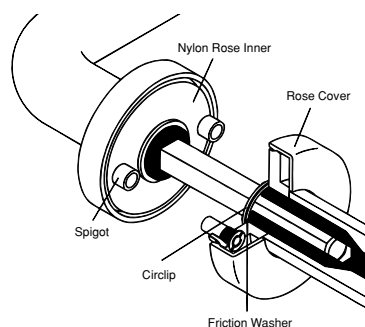

One lever is supplied with a floating spindle.

### Fixed roses and backplates

Levers are supplied pre-assembled to the rose or plate inner with a friction washer and circlip fixing ensuring a durable performance.

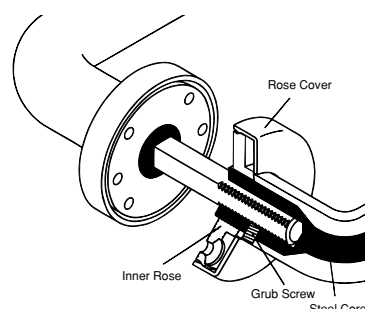

One lever is supplied with a floating spindle.

### Spindle fixed

Levers are supplied with loose roses or backplates.

One lever is supplied with a floating spindle with threaded section. The opposite lever contains a cup point socket grub screw which positively engages with the threaded spindle to firmly connect the levers together.

### Spindle fixed levers

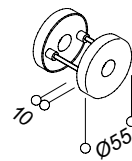

Levers and roses or backplate are supplied separately.

Roses are available with springing to suit lightly sprung latches.

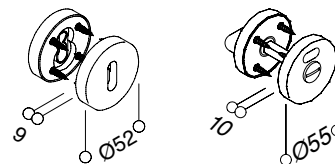

Levers are available in solid nylon or steel cored for extra strength and fire door applications. Steel cored levers must be ordered to suit the door thickness.

**Normbau nylon hardware - Pull handles**

The in-built strength of Normbau pull handles provides both durable fixing and lasting aesthetics. Available in either solid nylon or with a steel core for added strength, the pulls can be fitted singly or back to back in pairs using a variety of fixing types.

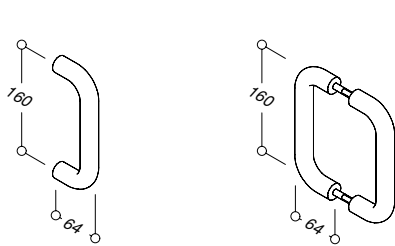

Each Normbau pull handle design is available as a 'thread side' or 'pin side' pull handle and should be specified according to the required fixing type. For example, a back to back pair requires one 'thread side' and one 'pin side' pull together with fixing pack 0471.

[Note: the smaller 23mm Ø pulls are the only exception and are supplied as dedicated single bolt through, back to back or face fixed assemblies].

## Briton and Normbau trim - Additional door hardware

The Briton and Normbau door hardware shown in this brochure form just part of a complete doorset specification. A wide range of additional components are available to complete each doorset. Detailed product brochures are available on the following items. Please contact the Customer Care Team on 01922 707400 for further information.

### Lockcases and cylinders

A complete programme of CE marked Euro profile mortice lock cases and cylinders to the latest European standards. Available with a full masterkeying service if required.

Briton 5500 Series lockcases

### Overhead door closers and floor springs

All carrying the renowned Briton brand, a large range of CE marked overhead door controls and floor springs suitable for all types of application from simple budget closers through to electromagnetic hold-open cam action closers. Available in finishes to match Briton and Normbau door hardware for a fully integrated doorset.

Briton 2300 Series cam action closers

### Panic and emergency exit hardware

From high end specification multi-point locking touch bar systems through to low end push bars offering single point latching, the Briton ranges of panic and emergency exit hardware are renowned for quality and reliability.

Briton 560 Series modular panic exit hardware

### Access control

Offering a selection of mechanical or electronic online or offline systems, Allegion manufacturers systems which can be used alongside other Briton hardware products to complete a doorset specification.
