

Briton products are available in a wide selection of finishes including:

- Solid metallic finishes
- Electroplated metallic finishes
- Powder coated metallic finishes
- Powder coated coloured finishes

Due to the limitations of the printing process it is advisable to check your choice of finish against actual product.

Solid metallic finishes

The solid metal finishes are polished finishes on stainless steel, aluminium or brass. The final finish is either a satin or bright mirror polished finish. Aluminium finishes are then anodised, brass finishes are protected with a lacquer unless indicated otherwise.

Plated metallic finishes

Products and components which are manufactured in other materials may be given metallic plated finish either for corrosion protection or to match other related items. For example, some items may be manufactured in brass or steel but have a satin chrome or satin nickel plated finish to integrate with satin stainless steel finishes.

Powder coated metallic finishes

A large range of items are available in a metallic powder coated finish which provides a consistent finish across a range of products manufactured in different materials. They provide good corrosion resistance, particularly suitable for items which are used externally.

Powder coated coloured finishes

The powder coated coloured finishes are specially formulated to provide a close match to the coloured nylon finishes of our Normbau range of door hardware.

Product variations

Door Controls

All door controls, whether projecting, parallel or track arm variants, are supplied with arms, brackets and/or tracks finished to match the body cover. In these situations the finish is quoted with a suffix S. For example, a closer in SE (powder coated silver) finish which has matching arms/brackets is specified as SES finish.

Black arm sets only available for 996 Series.
