

New Testament Church of God

Client:	Paul Henry Architects & Adonis Construction
Location:	Birmingham, UK
Products Used:	Briton 2100 Series door controls Briton 5500 Series lockcases CISA 7500 Series Cylinders

For such a large and busy church, subject to heavy and continual use, it was important to specify architectural ironmongery which would not only have long life high performance, but which would also complement the building's contemporary styling.

Birmingham's £5m New Testament Church of God, which is believed to be the biggest new-build church in Birmingham in the last 20 years, has recently been opened to the public.

The door furniture itself is precision engineered using marine grade 316 Stainless Steel. Designed to work seamlessly with Briton lockcases, the range meets BS 8300 guidelines, has been successfully fire tested to a two hour rating and carries a full 10 year guarantee.
