

South Lakes Housing

Client:	South Lakes Housing
Location:	Birthwaite, Windermere, UK
Products Used:	LCN 1460 & LCN 1461 Delayed Action Closers

Residents at Birthwaite sheltered housing in Windermere can now take advantage of delayed action door closers on the main doors of their apartments. This gives them ample time to get through the doors even if they are using a wheel chair or Zimmer frame, or just want a bit more time before the door closes behind them.

South Lakes Housing decided to fit LCN door closers at their Birthwaite sheltered housing and extra care facility in Windermere. Relcross Architectural Ironmongery supplied their specialist knowledge on LCN door closers. They were able to advise South Lakes on the best specification for their circumstances and the 1461 model, some with delayed action closing.
