

Client:	B&B Hotels Chain
Location:	Italy
Products Used:	CISA eSIGNO lock

The B&B Hotels chain was initially launched in France in 1989, with the aim to offer quality hotels at inexpensive, transparent prices. The hotel locations are carefully chosen to ensure maximum convenience and practicality for guests.

Thanks to modern technology, guests are free to leave the hotel whenever they want to, as each hotel has an automatic reception where guests can check in 24/7. This means you can arrive any time of the day or night and still be able to enter and get a room.

The Cisa eSIGNO locks meet all our needs. As well as its elegant design which adapts to any kind of door, it offers the advantage of contactless technology without the need of wiring - explains Nick Fung, Access Control Consultant for B&B Hotels. Designed with new build and retrofit in mind, Cisa eSIGNO locks from Allegion make the renovation and reopening of hotels much easier.
